LABEL MATRIX 8.6 — New Activation Wizard

Introduction:

Starting from LABEL MATRIX 8.6, the installation CD (or file) does not differentiate between Hardkey (dongle) or Softkey version. Now, both versions are consolidated into a single CD, Also, for the Softkey activation; it has a New Activation Wizard. Refer to this month NewsLynx for more details.

After installing LABEL MATRIX 8.6, the Activation Wizard will be launched.

- If you have purchased the Hardkey (Dongle) version, the Activation Wizard will not appear. The software works normally when the dongle is inserted to the system.
- If you have purchased the Sofkey version (or downloaded version) and does not want to activate the software, clicking “Try” allows you to use it for 30 days or 100 runs (depends which condition is reached).
- If you decide to activate the software, ensure the system is connected to the internet , then click “Activate”.
